## W\_WEIGHT

### Weight

*Weight*

This weight is aimed at adjusting some socio-demographic characteristics in the sample population to the distribution of the target population. It has been computed using the marginal distribution of Age, Sex, Education and Region.

## S018

### Equilibration weight-1000

*Equilibration weight-1000*

Equilibrated weights have been calculated using the formula:  $1.000/\text{sample size}$ . Equilibrated weight can be used when all countries and territories involved in the analysis are required to be treated as equal units, regardless of their population or sample size. The weights to be used are the product of the W\_Weight and equilibrated S018.

## PWGHT

### Population size weight

*Population size weight*

Population size weights have been computed using the formula:  $\text{target population size}/[\text{sample size} \times 10.000]$ . These weights are meant to bring gwght to a common denominator, when examining data for two or more countries combined. The weights to be used are the product of the W\_Weight and population size weight pwght.

## Gender module (G & H variables)

Gender module has been developed by the WVS team at the Institute for Future Studies in Sweden and the team of the Karolinska Institute in Sweden. Two versions of the module have been applied in Nigeria and Ethiopia and Zimbabwe. The surveys have been supported by the Bill and Melinda Gates Foundation. The module might be also applied in few more Sub-Saharan African countries and in India with the data to be available in 2021. The is not a part of the WVS-7 cross-country dataset but is available in the national data-files for Nigeria, Ethiopia and Zimbabwe.

## Country-specific education levels (Q275A, Q276A, Q277Q, Q278A)

Country-specific education levels – highest education level attained by the respondent; spouse; mother; father – are coded using scales provided by the national survey teams. Subsequent versions of the WVS data-set might include further updates. Countries surveyed, but not listed here means: the national team made a choice to use only international ISCED-2011 classification (coded in variables Q275, Q276, Q277, Q278).

## Racial and ethnic belonging (Q290)

This question is country-specific which includes both levels of the characteristic (coding either race or ethnic belonging depending on the country) and the adaptation of the scale by each survey team. Races are coded using single cross-country scale while for ethnicity every country proposed their own scale. Subsequent versions of the WVS data-set might include further updates.
